

Classification Vocabulary

Written by Brad Cloud

Monday, 27 September 2010 17:26 - Last Updated Monday, 27 September 2010 17:33

We began working on classification vocabulary in class today. The assignment requirements are as follows:

1. Write the **word**, the **definition**, a **drawing**, and a **key word** (one word that helps you remember the meaning of the word).
2. Write all of this for all 14 words in your science notebook.
3. You may find the definitions in your science textbook, a dictionary, online, or on the attachment below.
4. Complete this by Friday.
5. Use the completed notes during the vocabulary quiz in class on Friday.

The harder you work on this assignment, the easier the quiz will be.
